THE BOND MARKET STEADY

WALL STREET. 1 THURSDAY, April 1-6 P. M. The general situation in the stock market today is not materially changed. Extreme dulness prevailed in the early hours, and, with one or two exceptions, the range of prices showed the absence of a large buying movement. in the ma-jority of instances, however, these were firm, well sustained and calculated to provoke confidence, although, had the latter not been interrupted by the late sudden shock, it would doubtless have continued to invite investors and may have resuited in a stronger market. It was probably Sortunate that such a check came at the time it old, for it served to recall the caution that seemed to have been lost in the temptation to secure large profits. Important combinations are understood to be on foot between some of the large corporations, and considerable activity is expected to be developed whenever the result is made public Toward the close greater activity was exhibited, the cause being reported financial troubles in Germany, under the influence of which considerable selling took place. This was quickly followed by more favorable news, whereupon the buyers again came to the iront, and by their

CONFIDENT ATTITUDE put many prices to the highest point of the day. The particulars of the "flurry" will be found in another column. The close of the market was strong, and brokers and operators again left the street encouraged by the unexpected events of the day-always excepting, of course, the unfortunates who, selling what they did not own, came out short, sad and demoralized. The movement of speculation on the other side of the Atlantic, as it is described by cable reports, is not likely to exert dangerous influences on our own market, because it appears that the principal sufferers are the "bears." The extraordinary phoyancy reported is the result of operations in the French lean and of the extravagance that has grown out of a plethoric and inflated condition. In other words, the Germans of 1875, like the Americans of 1873, have apparently gone crazy over too much

was again active. The price opened at 114% and closed at 114%. The sales in the interim were made at 114% a 114%. There were some evidences that the clique are not so much demoralized as has been recently reported, and the buying to-day, with its attendant advance, was strongly suggestive of a renewal of the late speculation. As before indicated in this column, merchants de serous of using coin will find more safety in borrowing on long time than in dabbling in the commodity at present unsettled figures and under circumstances that may make them suffer from the sudden squeezes of the market. The porrow ing rates were 1-32 and 1-64 per diem and 2, 1 and \$ per cent per annum. At the close toans were made flat. The following were the

WALL STREET NOTES.

STOCKS FEVERISH-THE BIG BONANZAS TAKING ANOTHER PLYER.

Another feverish day is to be recorded in Wall street. Stocks opened very strong, and then felt of about one per cent as easily as they were advanced. Union Pacific-considered the leader-was noticeable for strength, but suddenly yieldeds to the bearish seeling and declined with the general market. Upon inquiry it was learned that the magnates of the

PANAMA AND OVERLAND RAILBOADS had not adjusted their differences, and it was a matter of some doubt whether they would be able to do so. As a matter of news it may be stated to do so. As a matter of news it may be stated that no meeting took place of the high contracting parties of the Big Bonanza stocks, and they remain in stata quo. There are two or three parties who absolutely control the monopoly known, as the Panama Basiroaat Company, and they insist upon their own terms in the new arrangement. As an evidence that this may be yielded Union Pacific advanced to 87 bid after business hours at the aiter linch Deimonico Exchangs.

About two o'clock despatches arrived from Europe in which financial troubles were indicated on the Berlin Stock Exchange. Mady firms were said to have failed, and two unfortunates had committed suicide. The news was immediately reflected in our market.

GOLD ADVANCED TO 114% and stocks tumbled like rocket sticks, but inasmoch as the German trouble was understood to be a "bear" panic, stocks advanced more quickly than they had receded. The German bankers stated that the troubles were caused by the advance in prices, and that the reported failures were caused by jarvies being snort of stocks, the money market at Frankiert being quoted at 31, per cent.

CRIMINAL STUPIDITY.

HOW LIZZIE STERN WAS KILLED-A MOTHER-BATHED WITH ICE-COLD WATER IMMEDIATELY AFTER THE BIRTH OF A CHILD.

At half-past ten, o'clock yesterday morning Coroner Croker began an inquest into the case of the unfortunate young woman, Lizzie Stern, who died on board the steambeat Believue about ten days ago. It will be remembered that the deceased had been an inmate of the Charity Hospital, which institution she left on the 21st nit on a pass. She visited a friend in Eldridgestreet, and while there was taken sick with labor pains and it was found necessary to remove her to the hospital again. Accordingly she was taken, to the Tenth precinct station house, and sub-

to the hospital again. Accordingly she was taken to the Tenth precinct station house, and subsequently removed to Bellevie Hospital in an ambulance. Notwithstanding the night was a bitter cold one—the thermometer standing below zero—and that the woman was in great pain, she was not taken into, the hospital, but sent on board the steamer Bellevine, which lay at the dock at the loot of Twenty-sixth street. Here the chief was born and here the hapless woman deal from the effects of the most outrageous treatment.

Dr. Bobert Murray, house physician at Bellevine-Hespital, was the first witness called. He said he was called to attend the deceased about fifteen minutes after she had been piaced on board the boat; he found the cabin in which she lay so bitterly cold that he was compelled to keep his overcoat on, and the nurse could not dispense with her shawl; there was no fire on the boat, either in stoves or the furnace, and of course nawarm water could be had; neither the watefinan, who is supposed to be on the boat or dock all the time, nor the fireman could be found to get up steam; in consequence of this state of affairs cold water directly from the bydrant on the dock had to be used for bathing purposes.

Dr. Murray incluer testified that if warm water cound have been had and the room been properly heated the woman would undoubtedly have lived. Stephen Irwin, the enginest of the Bellevie, and pis fireman, swore point blank that the fires are kept up night and day, and that when they left the boat on the night in question the cabin was undoubtedly cold. Another waters wore that when the were twenty-five pounds of steam in the boiler.

Another man swore that when he went on board the steamer early in the morning the thermometer in the cabin midcated eighty-six degrees above zero.

At one o'clock the case was adjourned, the jury being instructed to be on mand again at eleven o'clock this worungs. When the taking of testimoly will be resumed.
